Solutions & Implementations Submission Format

Written Answers

a. If you are nominating a brand-new product, state the date on which it was released. If you are nominating a new version of an existing product, state the date on which the update was released. If you are nominating an implementation, state the date on which the implementation was completed. Required

A new version of the Ultra-Staff EDGE Scheduling Module was released on February 15th, 2021.

About the Ultra-Staff EDGE Scheduling Module:

The Ultra-Staff EDGE Scheduling Module is a web-based SaaS solution designed exclusively for medical staffing companies to help staff medical professionals quickly and efficiently. The facilities they staff at include hospitals, clinics, nursing homes, and more. Not only do medical staffing companies benefit from the robust features and user-friendly interface when scheduling employees, but facilities and medical professionals also receive significant value from their scheduling experience. Annually, millions of medical professionals are staffed using the application.

Through the Ultra-Staff EDGE Scheduling Module, medical staffing companies are given access to an extensive candidate database they can use to search for medical professionals based on shift availability, skills, credentials, location, and more. The powerful system even performs credential checks when staffing shifts in order to avoid placing candidates that have expiring credentials and to prevent double booking. Once shifts are scheduled, staffing companies can email these out to both the facility and medical professionals. In addition to the powerful search and scheduling capabilities, staffing companies are able to manage shifts and keep track of pertinent information. All open, filled, pending, and ended shifts can be viewed on a color-coded calendar interface.

The Ultra-Staff EDGE Scheduling Module is unique because it's part of a larger-scale enterprise SaaS staffing and recruiting software solution that includes powerful features for recruiting and sales. Medical staffing companies are not only able to use it as a scheduling tool, but they also have access to applicant tracking and customer relationship management tools.

b. Describe the features, functions, and benefits of the nominated product, service, or implementation (up to 350 words). Required

In February of 2021, a new version of the Ultra-Staff EDGE Scheduling Module was released that included a Pay Package Calculator. The Pay Package Calculator helps medical staffing companies schedule travel nurse packages and long-term assignments that involve sign-on bonuses, per-diem, and other travel perks that require gross margin to be assessed. Without the Pay Package Calculator, this information is very difficult to calculate manually.

The Pay Package Calculator provides the medical staffing company a detailed calculation and analysis of Pay/Bill Hours, Pay/Bill Rates, Overtime Calculations, Bonuses, Holidays, etc., that are offered to a candidate as a part of a job. Once the basic information is entered on a Pay Package, it provides the staffing company with an Expected Gross Margin Percentage and Mark Up.

The calculator also allows staffing companies to estimate different pay packages in order to calculate the optimal gross margin and mark up. Once the pay package is complete with the benefits and compensations, it can be emailed directly to the medical professional from the software for them to accept or decline the package.

The Pay Package Calculator has been a game-changer for medical staffing companies because it saves manual work and helps facilities staff quicker. This tool was especially important during the pandemic when nurses and doctors had to be staffed as quickly as possible.

In addition to the Pay Package Calculator, advanced search and communication tools were added. Medical staffing companies can search for professionals via a nickname, area code, and check a box to exclude searching for professionals that have already been assigned. From the search results, staffing companies can also send a bulk text message to medical professionals about shift availability. Right from the text, the professional can accept or decline the job offer.

Emailing daily, weekly, and monthly shift schedules to both facilities and professionals was also an added feature. Staffing companies can email schedules out via a calendar format or a list. This gives facilities an overview of who is scheduled to work and also gives the medical professionals a summary of their upcoming shifts.
